Close-up of Drinking Nozzles

Tank with optional Coozie

- The 23-gallon water tank (15% larger than previous models) and Power Pac allow the Vertical Power System complete mobility and can re-hydrate up to 6 people simultaneously with the fluid of your choice (water, commercial sports drinks or proprietary liquids).
- **When dispensing ANYTHING other than drinking water, the warranty is void if the Other Liquids Cleaning Instructions, as outlined in the Maintenance Guidelines, are not followed.**
- The coiled nozzle hoses keep them off the ground and Waterboy Sports' patented Safety Spouts prevent the nozzles from coming into contact with the drinker's mouth, reducing contamination possibilities.
- Drain sump assists in more complete emptying of the water tank for cleaning and off-season storage.
- Like all Waterboy Sports Pressure-fed Hydration Systems, this model requires no cups, thereby eliminating clean up time and saving landfill space.
- Flat-free tires eliminate tire pressure monitoring.
