Adult CourseWork—Machine & Software Mastery

software for both systems is on the same CD!)

The software writes to most embroidery machine formats, so it will work with any brand of embroidery machine, both home and commercial, and it works cross-platform.

And the cool thing? There's a package for everyone. The software has three levels: Level 1, Level 2 and Level 3. I'm always concerned with the usefulness of "entry level" software. No worries here. With Level 1, you can transform any artwork into embroidery designs quickly and easily. I could happily do 80% of my embroidery design work in Level 1. Level 2 is recommended for people who need the tools to create intricate and professional designs for logos, emblems, appliques, and more. Level 3 is the ultimate package for the adventurous embroidery wants the flexibility to bring to life everything that's possible in digitizing.

And, it's REALLY affordable. Considering machine embroidery packages worth their "mustard" typically sell for $2,000.00 or more, Designer's Gallery Design Creator starts at $239.00. Really. And, across the board, it's REALLY good software!

And this is JUST the class you need to unlock the potential of your new software.

Sue Green-Baker—She's Back! SAVE THE DATES!

Hold on to your hats everyone—Sue's back with her "When to Serge, When to Sew" 3-day overlock series! One of the most sought after educators in the sewing world, Sue is masterful, engaging, and will alleviate ANY reservation or hesitation you might have ever had about using an overlock.

Don't know who Sue is? Considered "THE SERGER EXPERT", Sue has been teaching sergers for as long as sergers have been on the home market. She has co-authored several serger books, including Decorative Serging with Palmer/Pletsch, ABC's Of Serging with Tammy Young, Sewing With An Overlock by Singer Sewing Reference Library, and published several serger technique workbooks and booklets. Beyond her acumen, she's an incredible instructor who puts everyone at ease.

With both courses, you will receive a CD with Sue's workbooks in PDF file format. Your fee for each course includes a CD with Sue's workbooks, fabric sample packets for each day of the workshop, and lunch. If you own a Baby Lock Ovation or Evolution, you will need to bring it for class. If you do not, one will be provided for you. Level 1 Course fee: $299. Level 2 Course fee: $299. Supply list. Maximum enrollment: 20 students. (Please note: EVERY class we have offered with Sue has filled to capacity with wait lists... Don't wait to register until the last minute...)

Standing Ovation—Level 1

Ever wonder how to use a serger? Ever been intimidated by all those threads and needles and loopers? Fear not! In three short days, you'll receive 18 hours of complete overlock instruction! When you leave, you'll know exactly what all those needles and loopers do, why you'd use them and when, AND how to thread and set the serger for perfect stitching every time.

On day one, Sue covers all the basic fundamentals of the serger—from needles to thread, from loopers to differential, from tension to stitch width. And, you'll sew a myriad of samples for your

first workbook. (Yes! You'll leave with samples and 3 completed workbooks!)

On day two, you'll launch right in to elastic insertion using the "factory method". You'll follow this up with gathering fabric on the serger, how to roll hems, serge curves, make pintucks and serger crochet edgings, use decorative threads, make lettuce edges and why and when to use flatlock.

Day three—look out! You're going to learn all about coverstitch and chain stitch—with plenty of sewing samples to fill the pages of your third workbook.
