

~ EXHIBIT "A" ~

To: <b>Alpine Town Council</b> Alpine Town Clerk	May 4, 2010
Subject: Construction of Phase II Collections System	

Dear Sirs and Madam

Several of the lot owners and business in Alpine are requesting that you immediately stop the construction of Phase II Collections System until the pending litigation is settled. Our Lawyers feel very strongly that you will not be able to shut people's water off in order to force them to hook on to the sewer and also you will not be able to force people to abandon good working septic system just because they are 15 years old. As a result of this you will not be able to force people to hook on the collections system. There is not any technical reason that requires the town to install the collection system immediately.

If the town can't force people to hook up, then it can't create a revenue stream to pay the cost of the phase II system.

**Signed: Alpine Residents - Owners of Sixty Plus Properties and Businesses**
