

# SS ArmourGuard EPX™

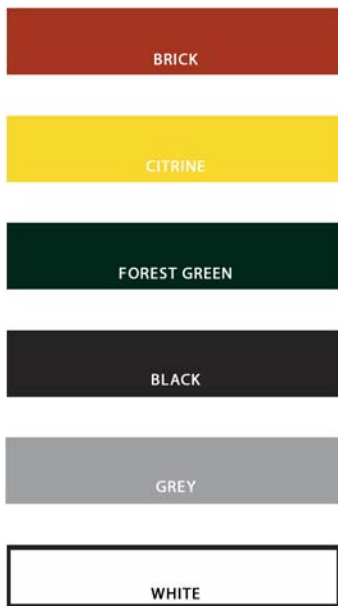

## Industrial Lithium Micro-Coating

### PRODUCT DESCRIPTION

SS ArmourGuard EPX™ is a penetrating, high-solid lithium silicate designed to give the look and protection of an industrial topcoat finish without the need for a regular epoxy. The material dries rapidly to a very hard, colored, semi-gloss finish, protecting the surface from corrosion and chemical abuse while increasing abrasion resistance.

SS ArmourGuard EPX™ is designed for interior or exterior use on new or existing concrete. With unmatched durability and fast installation, SS ArmourGuard EPX™ will dramatically reduce maintenance costs and downtime while providing lasting protection. The material is low in VOCs, has a very low polymer odor, and is safe for the environment.

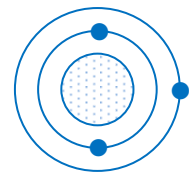

SS ArmourGuard EPX™ is available in six standard colors.\*

*\*Please understand that these colors are as close a representation as possible, however color may vary depending on the condition of the concrete being treated.*

### SS ArmourGuard EPX™ FEATURES

- Penetrating – bonds to the substrate
- Durable - outlasts the competition
- Fast-Drying – dries in 30 minutes
- Quick & Easy Installation
- Won't peel, tear, rip or flake
- UV-Stable
- Environmentally Safe - very low polymer odor, low in VOCs
- Protects against corrosion, abrasion, and chemical abuse
- Easy to clean and maintain
- Interior/Exterior Application
