

SS LineStripe™

Nano Lithium Line Striping

PRODUCT DESCRIPTION

SS LineStripe™ is designed for use as a lane, parking, and traffic marker for concrete, asphalt, and masonry substrates. It is a water-based, high performance, lithium silicate formulation that provides long-lasting surface protection and easy maintenance.

SS LineStripe™ is available in five standard colors.*

THE LITHIUM DIFFERENCE™

SS LineStripe™ FEATURES

- Single-component application
- Very light etch – easy prep
- Dries in as little as 1 hour and can open to traffic in a few hours for minimal facility downtime
- Durable
- Superior Performance - meets or exceeds ASTM standards for resistance to:
 - Blistering, adhesion, and discoloration (ASTM D- 870)
 - Abrasion (ASTM D-4060)
 - Gasoline and motor oil (ASTM D-2795)
- UV-Stable
- Non-Hazardous - no vapors, noxious fumes, or odors
- Non-Flammable
- Environmentally Safe - low VOCs, solvent-free
- Easy Clean-up - equipment cleans up easily with soap and water
