

This is the template I created to do the 5" Circles for the Let's Party Seuss Quilt.

Place the open part around the circle you want to cut. Next, put the circle part back into the open circle. Remove the outer circle part leaving the inner circle around the Seuss Character you desire. Center the circle cutter in the circle and press the circle down to securely hold the fabric and use the circle cutter to make the cut.

This process produces perfect, round, clean cut circles and when used the same way with the Steam-A-Seam II Lite gives a bonding that exactly fits the cut fabric.
