

Demolition Permit Procedure

- Verify asbestos inspection completed and letter to proceed from Utah Division of Air Quality (**Exception to rule:** Demolition of residential outbuildings of less than 100 sq. ft. by an individual contracted to do demolition **or** demolition by a home owner doing **his own demolition** on **his own residential property** and **not hiring** others to do demolition [Air Quality Rule 307- 801])
- Verify company doing demolition is correctly licensed by State to do work.
- Letter defining disposal site and route through City to disposal site.
- Letter defining precautions for pedestrian safety.
- Letter defining dust control measures.
- Date to begin demolition.
- Copy of Questar Service Kill (SK) Permit. [Obtained at 1-800-323-5517]
- Work order to terminate sanitary sewer service and plugging of line.
- Work order to terminate culinary water service, fee to disconnect at corp stop, and street cut permit or statement to leave active for future use.
- Work order to terminate electrical service drop.
- Issue demolition permit.

Asbestos

General Asbestos Information

Asbestos is a name given to a group of minerals that occur naturally as masses of long silky fibers. Asbestos is known for its unique properties of being resistant to abrasion, inert to acid and alkaline solutions, and stable at high temperatures. Because of these attributes, asbestos was widely used in construction and industry. Asbestos fibers are woven together or incorporated within other materials to create many products.

****Inspection Requirement****

When a structure or facility is to be demolished or renovated, an inspection, conducted by a certified individual and company, is required (UAC R307-801-9). ***An asbestos survey report must be generated, and available onsite to all persons who have access to the work site.*** Furthermore, the asbestos survey must be maintained by the operator or owner for one year after the completion of the project. The asbestos survey report contains the following information:

1. a brief description of area;
2. a list of all suspect materials identified in affected area;
3. a list of samples collected from affected area;
4. a statement of the asbestos content of each sample or materials assumed to contain asbestos; and
5. a list of potential locations of suspect materials that were not accessible during initial inspection (UAC R307-801-10).

Contact the Utah Division of Air Quality at: (801) 536-4000

www.airquality.utah.gov/eqair/haps/asbestos/

Questions?

Contact the Utah Division of Air Quality at: (801) 536-4000 for asbestos inspector and contractor lists, notification forms, and information about rules, or see our web page:

www.airquality.utah.gov/eqair/haps/asbestos/

Renovation or Demolition?

What you need to know before you start

Utah Division of Air Quality

150 North 1950 West
PO Box 144820
Salt Lake City, Utah 84114-4820

Phone (801) 536-4000
Fax (801) 536-4099

Are you Remodeling or Renovating?

You are subject to Federal Regulations 40 CFR 61.145(a) and/or Utah Administrative Code (UAC) R307-801-9 requiring inspection for asbestos.

Avoid asbestos exposure by workers and building occupants, penalties \$\$\$ and delays. Have your project inspected for asbestos by a State Certified asbestos inspector before commencing work.

It is illegal to improperly disturb some asbestos-containing materials.

Asbestos can be found in these common building materials: ceiling textures, vinyl floor coverings and mastic, boiler and pipe insulation, ceiling tile, roofing products, clapboard shingles, and many other building materials. Many of these materials can release harmful asbestos fibers and are regulated. A certified asbestos inspector can determine which materials contain asbestos and which are regulated.

For ALL Renovation Projects:

- ☞ Structures/components to be disturbed ***must be Inspected for Asbestos.***

- ☞ Buildings of ***any age*** may contain asbestos, even those newly built may have asbestos containing materials.
- ☞ Asbestos containing materials that are regulated or may become regulated ***must be removed by a certified asbestos removal contractor*** before they are disturbed by renovation activities.
- ☞ A ***written notification*** to Utah DAQ, payment of a notification fee and ***two week waiting period*** may be required before the removal of large amounts of regulated asbestos-containing materials.
- ☞ Regulated asbestos-containing waste material ***must be disposed*** of at an approved asbestos waste disposal site.

Contact the Utah Division of Air Quality
at: (801) 536-4000

www.airquality.utah.gov/eqair/haps/asbestos/

Demolitions, Destructive Salvage, House Moving

You are subject to Federal Regulations 40 CFR 61.145(a) and/or State Rules UAC R307-801-9 **even when there is NO asbestos found in the structure.**

Prior to Demolition:

- ☞ **Inspection:** the building ***must be inspected for asbestos*** by a state certified asbestos inspector. Contact Utah DAQ for a current list of Asbestos Inspectors.
- ☞ **Notification of Demolition** form must be submitted to the Utah Division of Air Quality, even if no asbestos was found during the inspection.
- ☞ **Asbestos Removal** (if necessary) must be performed by a Utah Certified Asbestos Contractor.
- ☞ **Pay the Notification Fee** (see our website for the fee calculator).
- ☞ **Wait Two Weeks:** demolition cannot proceed until two weeks from the postmark or hand delivery date of the notification of demolition.

Violation of asbestos regulations can result in exposure to asbestos, monetary \$\$\$ penalties and project delays.
