## THE SCRAPS

Wow, we're coming up on 14 years! Hard to believe!  
A lot of changes have occurred in the fabric and quilting industry in those years. The young women starting to quilt today have embraced our traditional styles and techniques with a whole new 'modern' vision. Fresh new colour combinations are emerging and conventional rules are being broken and re-written. But most importantly, young women and men as well, are sewing and quilting for themselves, their growing families and their communities.

Whether you are a new quilter or an experienced quilter with years of sewing behind you, quilting is about 'community'. Groups getting together to sew and quilt in support of themselves and others. Years from now, quilters will continue to gather with a whole new vision, inspiring many more generations of home-sewers.

Yours in Stitches....Katja
