

Make Folded Corners without drawing pencil lines!

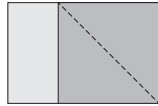

Item #502

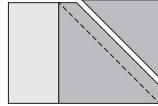

Folded Corners is a method of adding a triangle to a corner by using a square of fabric. The traditional method has 4 steps:

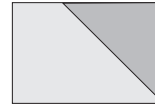

1. Draw pencil line

2. Sew along line

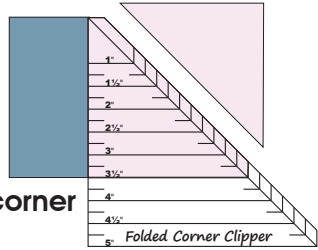

3. Trim seam allowance

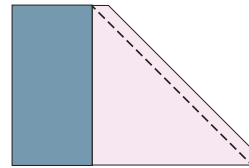

4. Press open

The *Folded Corner Clipper* eliminates the need for drawing pencil lines.

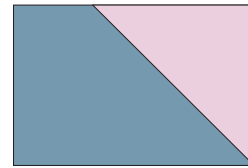

Trim the corner first to identify the sewing line!

1. Trim corner

2. Sew with $\frac{1}{4}$ " seam, corner to corner

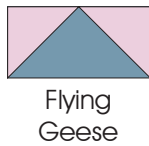

3. Press open

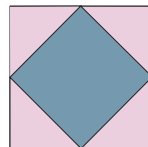

The Folded Corner method is used in a variety of blocks:

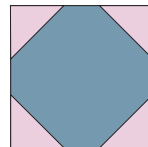

Cornered Rectangle

Flying Geese

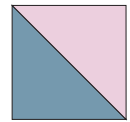

Diamond in a Square

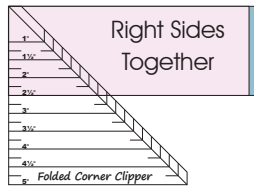

Snowball

Use leftover corners to make a Half-Square-Triangle Block.

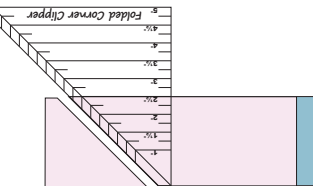

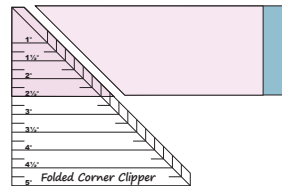

Make fast Half-Square Triangles:

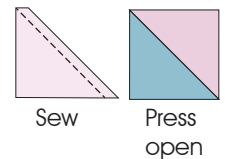

Cut two strips, $\frac{1}{2}$ " wider than finished block. Place strips right sides together.

Align edge of *Folded Corner Clipper* with left side. Trim.

Rotate template and repeat.

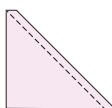

Sew

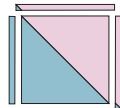

Press open

Trim Half-Square Triangle Blocks to size:

Leftover HST Blocks can be trimmed to size after pressing open, but it is time-consuming:

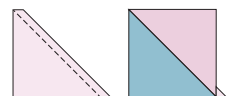

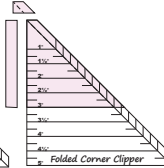

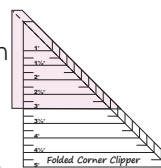

Press open

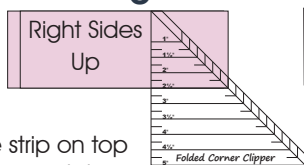

Trim 4 sides

Instead, before pressing, place bottom edge at desired size and align seam line with the FCC line. Trim dog-ear and left edge.

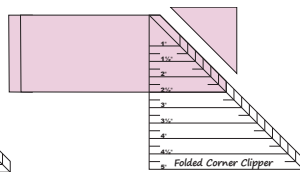

Press open. Much faster!

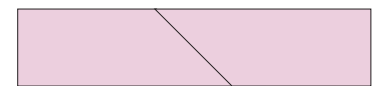

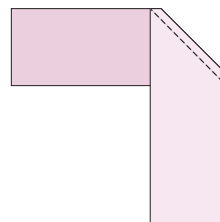

Great for Bindings too!

Place one strip on top of the other, matching right edges, with **both pieces right side up**.

Align markings of FCC with lower right corner as shown. Trim.

Rotate top piece and place wrong side up on the bottom piece. Sew $\frac{1}{4}$ " seam and press open.
