

Belize Liveaboard

June 10-17, 2017

303-220-8282

We'll be diving in the western hemisphere's largest barrier reef with amazing marine life. There are a great number of pelagic fish such as sharks and rays, and also commonly seen are turtles and lobsters.

We will be diving Turneffe Reef, Lighthouse Reef and the famed Blue Hole. The visibility averages 150 ft., which makes this entire stretch of reef ideal for photography.

We'll be spending our week on the Sun Dancer II. Each stateroom has a private toilet, shower, sink, individual air conditioning units and plenty of storage space. The vessel features a roomy salon, dining area, sun deck, wet bar and photo editing area.

The dive deck includes individual dive lockers, camera table, two hot, fresh water showers and room for everyone.
