

Galapagos

January 9-16, 2017

303-220-8282

The **Galapagos Islands** are legendary for the inspiration given to Charles Darwin in formulating his evolutionary theory. The “Enchanted Islands” offer unique encounter experiences with prolific wildlife both on land and sea. Large animals abound: sharks, sea lions, seals, turtles, and rays are seen on nearly every dive.

Only 25,000 visitors are allowed on the islands each year! This fact makes the wildlife on Galapagos relatively unafraid of man. You are invited to join One World Dive & Travel for a once in a lifetime trip as we explore Galapagos the way it should be.

We will spend 7 nights aboard the luxurious **Galapagos Master** Liveaboard as we visit the Northern Route of the Galapagos chain including the islands of Wolf & Darwin.

The diving in Galapagos is best described as electric and unpredictable. We never know what's going to cruise by or what we will run into. We will start with a warm up dive with the sea lions and move right into schooling hammerheads and other shark sightings! Ask any serious diver and they will tell you that Galapagos proves to be one of the best diving destinations in the world!

► What's Included

- Roundtrip airfare from Quite/Guayaquil to Galapagos
- 7 nights accommodations aboard the Galapagos Master Liveaboard
- All meals on board the vessel
- Tea, coffee, juices and soft drinks
- Guided land excursions
- Diving as scheduled
