

Raja Ampat, Indonesia

November 8 - 23, 2017

Biodiversity at its best...that is the only way to describe diving in Indonesia. We will be exploring one of the best areas of Indonesia: **Raja Ampat**. From muck diving for some of the most interesting critters in the sea, to diving with big pelagics, this trip has it all!

Raja Ampat has been appointed by UNESCO as a World Heritage Site. There are more than 1800 different species of animals, more than anywhere else in the world. Add in warm water, soft corals, sea fans and amazing hard corals and you will be spoiled from the beginning.

We'll spend eleven nights on the WAOW. This luxurious liveaboard offers amenities including spacious cabins, private bathrooms, large salon, dive area, expansive leisure decks, dedicated camera room, covered outdoor dining area, laundry and massage service. This is one of the most comfortable dive vessels out there!
