

Tahiti

May 9-18, 2017

French Polynesia, commonly referred to as one of the main islands, Tahiti, is known for its plethora of small islands with stunning white beaches surrounded by crystal clear warm water. Situated in the heart of the Pacific Ocean, this island archipelago is home to hundreds of schooling sharks, resident manta rays and bottle-nosed dolphins.

You are invited to join One World Dive & Travel as we explore the Fakarava and Rangiroa areas by liveaboard. A typical diving day will see you cruising through channels and exploring the outer reefs of the atolls, yet there are numerous shallow dive sites within the Tuamotu Archipelago, each with stunning hard corals, sheltering all manner of crustaceans and mollusks.

We'll spend seven nights on the French Polynesia Master. This luxurious liveaboard has four decks with amenities including spacious cabins with private bathrooms, large salon, expansive leisure decks, sun deck, covered outdoor diving area with individual lockers, camera set-up station and camera table.
