

Longarm E2E Quilting Service Form

The Quilter's Ranch 1721 E Warner Rd #C-8 Tempe, AZ 85284 480-838-8350

Only Edge to Edge hand guided quilting will be completed currently. This means one pattern is sewn from one edge of the quilt over to the other edge of the quilt. The quilt will not be removed from the frame to allow for any special border or sashing treatments.

Sheets will not be accepted as backing.

Quilting Fees:

- Edge to Edge hand guided pantograph quilting starts at 2.0 cents per square inch, for example an 80x80 quilt would cost 128.00 for just the quilting fees, if using a basic pantograph that is not too dense. See below for all other charges.
- Minimum order is 50.00.
- Bring in your top pressed, if QR presses your top there will be an extra charge. This charge will be discussed before quilting begins
- If seams need repairing, the customer will be notified prior to quilting commencing. QR does not repair seams.
- Excess batting removed and batting squared (if batting supplied by customer) \$10.00
- Squaring up backing and removing excess \$10.00
- Quilt will not be trimmed when returned to customer

All information below to be checked before customer leaves:

| Item | Description | Y | N | Initials |
|-----------|--|---|---|----------|
| Quilt Top | Center of quilt top is marked with safety pin, and a label says top of quilt. (Even if it appears to be obvious!) | | | |
| | Top is pressed flat, if not inform customer and customer initial ok to proceed as is | | | |
| | All loose threads are trimmed (if threads are visible inform customer), customer to initial to proceed with loose threads as is. | | | |
| | Center of the quilt top, bottom is marked with a safety pin | | | |
| | Note: For best results the quilt outside edge should be stay stitched. If not then during the process the seams could pull apart, even though the edge will be basted to the batting. Have customer initial that they understand | | | |
| Batting | If batting is purchased at Quilters Ranch, the quilter will cut it at the time of quilting and none of the following applies, you can skip to the backing section. This section only applies if the customer brings batting with them | | | |
| | Size and batting is at least 4"-6" larger than top on all sides Excess batting is removed. If not add an extra 10.00 charge for removal, customer needs to initial. All batting removed is returned to customer. | | | |
| | Batting top edge is even and batting appears to lay flat (no major creases or bumps, waves, etc.) | | | |
| Backing | Backing center, top is marked with safety pin, and the top of the back needs a label that says top of backing. Backing center bottom is marked (even if this appears to be obvious!) Backing top edge is even, and bottom edge is even. \$10.00 extra charge for straightening the back | | | |
| | Backing is pressed. The selvage should be removed from the seam in the backing. If not, inform customer and customer is to initial to proceed as is. When piecing the backing use a 5/8" seam and 12 stitches to the inch, then press this seam open. If you use a 1/4" seam press to one side. Backstitch at the beginning and ending. If center seam is <u>not</u> pressed, either open or to one side, have customer initial that they understand this will be quilted as is. | | | |
| | Backing is at least 4"-6" larger than top on all sides, and excess backing has been removed. If not there is an extra 10.00 charge for removing excess fabric. Have customer initial that they understand the extra charge | | | |

The QR offers a warranty on the mechanics of the stitching which allows for correction only. If you find a quality issue, please contact QR within 7 days.

The QR reserves the right to reject a quilt top for quilting for any reason.

Fullness Disclaimer:

Fullness and/or puckers within a quilt and its borders cannot always be quilted out. There is a limit on how much The QR can manipulate, so The QR cannot guarantee that puckers and tucks won't exist after quilting. In some cases, excessive fullness in borders may result in the quilt corners not being square. The flatter your pieced top lies, the better the finished results.

Mechanical Disclaimer:

Please be aware that a longarm sewing machine is a mechanical device. Although The QR will do its utmost to ensure perfect results, on very rare occasions mechanical malfunctions can occur (i.e. needle breaks at thick seams or the foot catches an edge) which may cause damage. Should this happen, The QR will collaborate with you on a repair procedure at The QR expense.
