

CROSS CONNECTION CONTROL

There are many connections to our water distribution system. When connections are properly installed and maintained, the concerns are very minimal. However, unapproved and improper piping changes or connections can adversely affect not only the availability, but also the quality, of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health. So, what can you do? Do not make or allow improper connections at your homes. Even that unprotected garden hose lying in the puddle next to the driveway is a cross connection. The unprotected lawn sprinkler system after you have fertilized or sprayed is also a cross connection. When the cross connection is allowed to exist at your home it will affect you and your family first. If you'd like to learn more about helping to protect the quality of our water, call us for further information about ways you can help.

CITY CODE

13.18.200 Cross Connections.

It shall be unlawful for any person to connect any part of the Pressurized Irrigation System to any part of any culinary water system so as to create a potential cross-connection whereby irrigation water could be introduced into any system that provides culinary water.

LINDON CITY SECONDARY WATER SERVICE

CONSERVATION MESSAGE FROM THE MAYOR

LINDON CITY

As you are most likely aware, the winter has given the Wasatch Front an average snow pack for this watering year. Wise water use is required to avoid over watering this summer. It is critical to follow the recommended watering levels from the Utah State University extension office.

HOW OUR WATER CUSTOMERS CAN HELP

To help conserve water, please remember to turn off your automatic timers for your sprinkling systems when it is raining. And please adjust your sprinkler heads to keep the water off the sidewalks and driveways, Water flowing down the gutter is wasted. Please help us conserve water by calling the Public Works office at: 801-796-7954 if you happen to see a broken sprinkler head or wayward system.
