

Class Bib Instructions

Pattern: Print and cut out pattern. Tape page 1 to page 2. Tape page 2 to page 3. Save **C Crumb Catcher** to use if you want to add it to your bib*.

Fabric required: 1/2 yard of 2 coordinating non-directional fabrics for front & back. (For directional fabrics, use 1 yard each for front & back. Will make 2 bibs.)

Iron fabric. Fold each piece lengthwise so folded fabric measures approximately 18" x 36".

The finished bib will be approximately 15" from the neck to the bottom of the bib. I suggest lengthening the pattern at the **B Lengthen Here** line by cutting along the line and moving it 3 or more inches down when pinning the pattern to the fabric.

Pin pattern to fabric with center on **fold line** and cut out one from each piece of fabric to make front and back.

With RIGHT sides together sew around bib 3/8" leaving 3" at bottom to turn.

Clip where indicated. Turn inside out. Iron the 3" area under 3/8". Top stitch close to the edge all around.

Sew Velcro on where indicated.

If you are going to add a crumb catcher to the front, use pattern piece **C and cut one of each piece of fabric. Sew RIGHT sides together at straight edge using a 3/8" seam. Turn fabric so RIGHT sides of fabric are out, iron and top stitch along the straight edge only. Pin to the front fabric where indicated, matching bottoms of fabric.*

Instead of crumb catcher you can customize your bib by sewing a ruffle in the shape of collar to the right side of the front fabric (you'll need 31"), a tie shape for a man's bib, or a pocket before sewing the front to back.
