Studio Throw & Topper

49" x 62" (Topper 49" x 49")

Stitch in Time Fabric Collection by Northcott Studios

The quilt block fabric printed smaller than originally planned. It is not possible to cut out 9" squares (with four blocks in the square) without cutting into neighboring blocks.
There are 2 solutions. Choose the one you are more comfortable using.

1. Increase yardage for quilt block print (39357-11) from 1 yard to 1-1/2" yards (13 rows of blocks, about 51"). All other fabric yardage remains the same as on the pattern. Fussy cut blocks at 9" skipping a row between blocks. You will be cutting into the surrounding blocks. See pictures.

2. Using existing yardage (1 yard), cut blocks at 8" instead of 9" and scale down measurements for sashing and setting triangles by 1". You will be cutting midway between blocks preserving 1/4" of tan framing around outer edges. Unlike the examples above, you will NOT see any of the tan around the outside of the square.

Solution #2 : To avoid buying extra yardage reduce block size from 9" to 8".
